1. Please notice that High Pressure Side by mark "+", and Low Pressure Side by mark "-"
2. Please pay attention that the pressure of high pressure side should be higher than that of low pressure side;
3. Please pay attention to protect the diaphragm, prevent it from damaging;
4. Temperature range of standard Viton O-ring of sensor is -20°C ~ 250°C . When working temperature is lower than -20°C
